writing, you use both sides of the paper, you reduce waste by 50 percent. Old envelopes, old bills, etc., make good memo paper. Do not discard a memo sheet until it is full. Don't burn discarded paper. Better to have it converted to pulp and composting it. Be thoughtful about paper. Be conscious of how much you throw away that could be put to other uses. You can save eight to ten trees per year if you see that all reusable paper is returned for recycling. Stack newspapers in bundles and save them for return to the paper and pulp industries. Look for those products which contain the most reused paper. Some products feature completely recycled paper. Encourage recycling by buying such products. A ton of paper saved or recycled saves seventeen trees—your family uses that much or more each year. This will contribute in a great way to save our earth from the imminent disasters caused by global warming.
