

## ACKNOWLEDGEMENT

The problems solved in the Thesis were suggested by ‘Dr.Sumit Saha, Assistant Professor, Department of Mathematics, Assam University, Silchar. It is privilege for me to convey my gratitude and sincerest thanks to Dr. Sumit Saha from the core of my heart at this auspicious moment for his valuable guidance, helpful discussions, constant encouragement and core attention to achieve this height in my research field.

I am thankful to the honourable Vice Chancellor, Assam University, Silchar, Prof. Bipul Syam Purkayastha, Dean of Physical Science, Assam University, Silchar and my supervisor Dr. Sumit Saha, Assistant professor ,Department of Mathematics, Assam University, Silchar for allowing me to do the work in the University.

I am grateful to all the teachers specially Prof. Kababi Dutta Choudhary, Dr. Nabendu Sen and the non-teaching staff of the Department of Mathematics for their kind co-operation.

My heartfelt thanks to the organising committee of **TMSR-2014**, Department of mathematics, Assam University, Silchar for giving me a chance to participate in the National Conference on Trends in Mathematical Science Research.

My special thanks to the Department of Mathematics, NIT, Silchar for giving me an opportunity to participate in the Workshop on Application of Mathematics in Science and Engineering.

Date :

Place :Silchar

(Biprajit Nath)

## ***Contents***

	<b>Page No</b>
<b>Chapter-1</b>	<b>A Study on Conjugate Gradient</b>
	<b>Methods and their modifications</b>
	<b>1-14</b>
<b>Chapter-2</b>	<b>Survey of Literature</b>
	<b>15-30</b>
<b>Chapter-3</b>	<b>Research scope in conjugate gradient</b>
	<b>method and objective of the work</b>
	<b>31-34</b>
<b>Chapter-4</b>	<b>A new initial search direction for</b>
	<b>nonlinear conjugate gradient method</b>
	<b>35-43</b>
<b>Chapter-5</b>	<b>A modified form of conjugate direction</b>
	<b>for general nonlinear function and</b>
	<b>its Convergence</b>
	<b>44-50</b>
<b>Chapter-6</b>	<b>A new testing procedure for sequence of</b>
	<b>step length in an Unpredictable manner of</b>
	<b>nonlinear Conjugate gradient method</b>
	<b>51-59</b>
<b>Chapter-7</b>	<b>Results and discussions</b>
	<b>60-72</b>
